Dedication to Quality

KCC Buildcon Pvt. Ltd.

In its pursuit for diversification, the company has ventured in mining field. As a first baby step, the company has entered into partnership for soap stone mining operations in Pithoragarh, Uttarakhand.

The Director is in active negotiations for purchase and or acquisition of operational rights for mines of metals and precious metals in Africa Region.

Uses of Soapstone Powder in Following Industries :-

Plastic Industry :----

consumes high quality ultra fine talc in polypropylene, polyamides, cable PVC and other plastic compounds. Talc is being increasingly used in HDPE, PP, LDPE, PVC, ABS & thermosetting compounds. It is excellent filler due to blending characteristics and thermal and electrical resistant. It is chemically inert. It provides the smooth feel to plastic surface. Due to its chemical inertness, superior electrical and thermal resistance and other properties talc imparts stiffness, hardness, tensile strength of plastic products, improves quality of their surfaces, gives them electrical, chemical and thermal resistance.

Application of Soap Stone in Paint Industries :----

Soap stone/French chalk/Stearite and Talc are synonymous which are used in production of decorative paints, industrial coatings, pigment pastes, primers, enamels, adhesives, putties and other products of the industry.

Application of Soapstone powder (Talc) in Ceramics :----

In ceramics talc is used mostly as low cost filler in ceramic tiles, sanitary ware, dinnerware, porcelain and electrical insulating

Application of Soap stone/Talc Powder in Pharmaceutical Industries :—

In pharmaceuticals talc is used as filler in tablets, ointments and dustings. Talc used in this industry must be highly pure, bacteria free, must contain no iron oxide, dolomite, carbon and other impurities.

Application of Soapstone in Paper industry :----

Soap stone powder (Talc) is used in three stages of paper making -as a filler, to control pitch and stickiest and in paper coating. During the paper making process, the micro impurities can clog the paper machinery. Talc being hydrophobic absorbs these micro droplets thus controlling their stickiness

and avoiding clogging. High brightness of talc leads to reduction in usage of expensive whitening agents and helps in controlling gloss of the coat.

Talc gives smoothness, yellow index, porosity, and opacity to paper, improves its yellow index and reduces the deterioration of the machinery. Our grades of Talc powder are in wide range for Paper industries.

Other Uses of Soap Stone Powder (Talc):----

Besides all above uses Soap stone/Talc is also widely used in Toilet Soap manufacturing, Cosmetic industries in baby talc powder, Detergent manufacturing, Dal mills (Pulses polishing), Textile, Printing Ink, Rubber industry and as a filler raw material in many chemical industries.

stands out with adequate **RJRAGHAV KRISHNA MULTITASKING OPC PVT.LTD**

with rich and diversified experience, is actively engaged in executing:

- Earthwork: carrying, dumping and compacting millions of cubic
- Metre of earth at the project site
- Supply of Sand and backfilling millions of cubic metre
- Excavation and Mining of Soapstone
- Installation of smart electric meters in residential houses in the state of Uttar Pradesh.

Within a short span of time,

RJRAGHAV KRISHNA MULTITASKING OPC PVT.LTD

has carved its name for delivering quality work.
